Datari

Careers: Developers

Vacancies for developers and business analysts with a focus on market data experience for the Datari website:

For Developers:

Title: Market Data Developer

We are seeking experienced and talented developers with a passion for market data to join our team at datari.io. As a Market Data Developer, you will play a crucial role in designing, developing, and maintaining our market data products and solutions. You will work closely with our data scientists and engineers to ensure the delivery of high-quality and reliable real-time aggregated data sources for crypto, forex, and equities datasets through REST-based APIs and websockets.

Requirements:

- Strong proficiency in programming languages such as Python, Java, C++, or other relevant languages.
- Solid understanding of market data concepts, including financial instruments, real-time data feeds, and data processing techniques.
- Experience with REST-based APIs and websockets for market data delivery.
- Knowledge of data normalization, data quality, and data validation.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork skills.
- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.

Apply by sending:
